## Work Experience

### AI Engineer (Fresher) • Vinfast

Jul 2026 - Oct 2026 | 4 months

- Developed an Edge-Cloud in-cabin voice assistant for driver intent detection and vehicle control.
- Trained and quantized on-device SLM/NLU models (INT8/INT4) for low-latency automotive inference.
- Built tool-calling Cloud LLM Agents for complex queries and fallback cases, optimized latency and accuracy.

### AI Engineer (Fresher) • TD Consulting

Jul 2025 - Dec 2025 | 6 months

- Integrated AI into recruitment workflows to automate candidate screening and improve hiring precision.
- Developed a recruitment chatbot and supported AI-enhanced web features.

### Data Analyst (Intern) • VKX Company

Jan 2025 - Jun 2025 | 6 months

- Cleaned and processed datasets, built visualization dashboards and analyzed trends to optimize workflows.

### AI Engineer (Intern) • Giong AI

Oct 2024 - Dec 2024 | 3 months

- Evaluated n8n and Dify, built LLM/API automation PoCs and delivered AI architecture assessment reports.

## Projects

### UWB Contactless Respiration Monitoring System

Role: Team Leader / AI Researcher

- Led the team and built real-time contactless respiration monitoring with XETHRU X4M200 IR-UWB radar.
- Optimized a TCN pipeline with PyTorch, NumPy and SciPy: approximately 79% smaller than the reproduced LSTM baseline while maintaining strong prediction performance.

### Hybrid Edge-Cloud In-Cabin Voice Assistant & Intent Prediction System

Role: Project Leader / Sole Developer

- Designed driver-intent prediction and in-cabin control with quantized INT8/INT4 edge NLU and tool-calling Cloud LLM Agents for multi-turn reasoning and fallback cases.

### RAG & Tool-Calling Test Case Generation System

Role: Team Leader / AI Engineer

- Coordinated the team and implemented test generation and evaluations of retrieval, answer faithfulness and tool execution with RAGAS, LangGraph and vector stores.
- Built synthetic fixtures for deterministic evaluations without live user data.

### Legal RAG Chatbot

Role: Team Leader / Core AI Engineer

- Served as team lead and primary developer for an LLM/RAG chatbot and legal retrieval pipelines.

## Skills

AI: LLMs, RAG, tool-calling, model quantization, TCN, YOLO, XGBoost.

Development: Python, PyTorch, NumPy, SciPy, PostgreSQL, Git, Docker.

Tools: LangChain, LangGraph, RAGAS, Langfuse, Qdrant, Neo4j, n8n, Dify.

## Education

FPT University | Bachelor of Science in Artificial Intelligence | 2022 - 2026

## Achievements

- FPTxNRC AI Hackathon 2025 - Second Prize
- Vingroup Applied AI Talent Program, Artificial Intelligence
- Excellent Student at FPT University - Summer 2025 Semester
